RCM News for April 2016

A newsletter for Resource Conservation Managers in the Northwest

In this issue:
Building Re-tuning
Exterior Lighting
LEDs
Lighting
Smart Buildings
Waterless Urinals
Upcoming Events & Training Opportunities
Resources for You

Building Re-tuning
“Management Insight: Laurie Gilmer”, a three-part article in the April 2016 issue of Facility Maintenance Decisions written by Laurie Gilmer, explores re-tuning as a method to increase energy efficiency in buildings. Re-tuning focuses on operational changes, and is a continuous process, unlike one-time building commissioning and energy audits. [RCM News editor note: A major part of an RCM's job is re-tuning, whether or not that is the name used to describe the process.]

Part 1: Re-Tuning Buildings for Improved Facility Performance
Part 3: Training, Preparing for Building Re-Tuning Process

Exterior Lighting
In a five-part article on exterior lighting published in the April 2016 edition of Facility Maintenance Decisions, James Piper writes about exterior lighting options, and that replacing exterior lights one for one in existing fixtures may not be appropriate. Factors in choosing energy efficient replacement lights include light distribution, glare control, and color rendering. The last section discusses lighting options for older adults, whose lighting needs are different than younger people.

Part 1: Exterior Lighting Upgrades Deliver Efficiency, Savings
Part 2: Auditing Process Helps Managers Discover Lighting System Savings
Part 3: Place Focus of Exterior Lighting Projects on Fixtures
Part 4: LED, HID, Fluorescent Fixtures Among Exterior Lighting Options
Part 5: SIDEVAR: Website Offers Lighting Designs for Older Adults
LEDs
“LED Upgrades for Fluorescent Tubes”, written by Eric Woodroof, for the April 2016 issue of Buildings magazine examines two case studies where snap-in LED tubes replaced fluorescents; one in an office retrofit, and one in a high bay setting. A cost breakdown for savings, installation costs, and simple payback is shown for both scenarios.

“7 Tips to Maximize LED Retrofits”, appearing in the April 2016 issue of Buildings, and written by Janelle Penny, Senior Editor, offers tips on how to choose LED products for a retrofit. The first tip is to identify the reason for a retrofit, such as wanting to reduce maintenance cost, save energy, or improve light quality.

Lighting
A three-part article on "Lighting", written by Rita Tatum for the April 2016 issue of Building Operating Management, focuses on advanced lighting systems. When considering high-performance lighting retrofits or new construction, elements other than efficiency must be taken into account, such as the optical quality and potential glare of the luminaire, daylighting possibilities, and the design and availability of fixtures.

Part 1: Technology, Design Advances Are Driving High-Performance Lighting
Part 2: High-Performance Lighting Means Balancing Budget with Quality
Part 3: SIDEBAR: Technology Gains in High-Performance Lighting

Smart Buildings
The “Smart Buildings” feature in the April 2016 online edition of Building Operating Management, written by Kurt Karnatz, is a two-part article on smart buildings, defined as more than just the building automation system (BAS). To plan and attain economic, environmental, and experiential (occupant-focused) goals of a connected (smart) system, strategic planning with all stakeholders are necessary, as well as modeling outcomes, and understanding the possibilities and limitations of the building systems.

Part 1: Making The Business Case For Smart Buildings
Part 2: Three Buckets of Smart Buildings Goals: Economic, Environmental, Experiential

Waterless Urinals
In the six-part “Plumbing and Restrooms” feature (the last two parts are sidebars) in the April 2016 issue of Facility Maintenance Decisions, Dave Lubach, Associate Editor, writes about advances in the new generation of waterless urinals. Water savings are important especially to facility managers who must reduce water use in drought states. Cleaning staff must be trained because waterless urinals do not rely on water for cleaning – odors are eliminated through a liquid sealant barrier.

Part 2: Water Shortages Increase Appeal of Waterless Urinals
Part 3: New-Generation Advances in Waterless Urinals
Part 4: Points to Ponder when Installing Waterless Urinals
Part 5: SIDEBAR: WaterSense Program
Part 6: SIDEBAR: ADA — Providing Pipe Protection
Upcoming Events & Training Opportunities

Energy Facilities Connections Conference
It's not too late to register for the 12th annual Energy Facilities Connections Conference! Spend 2 ½ worthwhile days in hands-on workshops, classroom presentations, and networking.

- May 3-5, 2016 in Leavenworth, WA

Click here for information

WSU Energy Program Plant Operations Support Consortium

Lighting Design Lab Classes
Lighting Design Lab offers a morning class and afternoon class at different locations.

Afternoon class: The Q&As of QPLs (Qualified Products Lists)

- May 4 in Tacoma
- May 10 in Seattle

Click here for information

Lighting Design Lab

ENERGY STAR® and Portfolio Manager® Trainings
All are online webinars.

- Benchmarking Water/Wastewater Treatment Facilities in Portfolio Manager – May 5
- Tackling WaterSense – Mechanical Systems – May 10
- Register for the 2016 Energy Star BOOTCAMP! – May 17
- Portfolio Manager 101 – May 24
- Portfolio Manager 201 – May 25
- Portfolio Manager 301 – May 26
- Ask the Expert – an open Q&A session every Wednesday at 9:00 AM Pacific time

Click here for more webinars and information

US EPA

Portland General Electric Seminars and Webinars
Portland General Electric offers online webinars and paid workshops open to everyone, and seminars and workshops free of charge to its commercial and industrial customers. All classes in Oregon or online.

- Taking Sustainability to the Next Level – May 11 in Portland
- Lighting Upgrades for Commercial Property Managers – May 18 in Portland
- Pump System Optimization – May 25 in Wilsonville

PGE Energy Education Classes

Portland General Electric, Energy Trust of Oregon

The Effect of Green Buildings on Cognitive Function
A 90-minute webinar sponsored by EPA about indoor air quality factors in buildings.

- May 11 online

Click here for more information

EPA Indoor Environments Division

E3T Showcase Webinars
These are a series of free, lunch-hour webinars bringing you information about energy efficient emerging technologies and strategies, sponsored by BPA and provided by WSU Energy Program.

- Emerging Technologies in the 7th Power Plan – May 12 online

Click here for information

WSU Energy Program, BPA
Building Operators Certification Technical Webinars

• Building Tool Diagnostics #4: Infrared Cameras – May 18
  Click here for more information

Building Operator Certification

BOC Level I certification is 74 hours of training and project work in building systems maintenance. Level II certification is 61 hours of training and elective coursework in equipment troubleshooting and maintenance. Classes usually meet one or two full days a month over a period of four to six months.

  All dates below are for the first class.

  • Washington State
    o Level I – May 23, 2016 in Silverdale
    o Level I – Sept 28, 2016 in Renton
    o Level I – Fall 2016 in Moses Lake
    o Level II – Sept 27, 2016 in Tacoma
    Click for BOC Washington State information

  • Oregon
    o Stay tuned for more classes!
    Click for BOC Oregon information

Building Operators Certification

Efficient, Effective Industrial & Commercial Lighting

• May 24 in Spokane
  Click here for registration and more information

Avista

RCM Webinar – Identifying Building Leaks and Heat Loss

Requested by the majority of those on the WSU Energy Program RCM Listserv, This webinar presentation explores various types of building envelope deficiencies, the signs that your building may have them, and diagnosing them with a thermographic camera and by other methods. WSU Energy Program building science specialist Luke Howard discusses the relationship between building deficiencies and heat loss, as well as a few basic repairs and upgrades to consider.

  • May 25 – 12:00 PM online webinar
  Click here to register

WSU Energy Program

West Coast Energy Management Congress

Energy conference and technology expo for business, industrial, and institutional energy users.

  • May 25-26, 2016 in Seattle
For more information

Association of Energy Engineers, PSE

Introducing New Variables: Developments in Variable Speed Technology

• June 3 in Wilsonville, OR
  Click here for more information

Oregon Association of Professional Energy Managers
Energy Management Certificate
Registration is now open for the annual “energy bootcamp” offered by the Northwest Water & Energy Education Institute. This advanced certificate program covering a wide array of energy management topics is not to be missed.

- July 11-22, 2016 in Eugene, OR

For more information
NWEEI

Resources for You

Survey on Tracking Electric Demand in Portfolio Manager
Do you want to be able to track electric demand in Portfolio Manager? If yes, take the short survey that Energy Star has made available to gather more information. Identifying what specific information users want to track, and how they want to use it, will help Energy Star incorporate the feature into Portfolio Manager, possibly by early 2017.

Green Leases
Commercial building leases can be leveraged to reduce energy use when the lease structure is changed so that landlords and tenants alike benefit from energy efficiency improvements. BetterBricks has gathered resources on the topic of green leases, such as case studies, tips and strategies for communicating energy efficiency goals, ways to make an existing lease “greener”, and providing models of green leases.

Do you have newsletters, websites and links to share? Do you have RCM questions?
RCM News is always looking for interesting information, tips and resources to share with other resource conservation managers. Our goal is to increase your success by sharing what you and your colleagues are doing – with energy efficiency measures, problem-solving, communication, data tracking, presentations, and more. In addition, WSU Energy Program can help find solutions to your RCM program’s technical and programmatic questions. Email Karen to share and ask!

Washington RCM Support
The Washington State University Energy Program provides RCM support. Check out the “RCMx” website: http://www.energy.wsu.edu/PublicFacilitiesSupport/ResourceConservation/RCMx.aspx. We appreciate any feedback on this site and would also appreciate items to add to our resources, such as tools, examples of policies and job descriptions.

RCM News is prepared by the Washington State University Energy Program
This activity is funded by the U.S. Department of Energy State Energy Program. Funds provided through the Washington Department of Commerce Energy Division.
