

U.S. DEPARTMENT OF ENERGY

Northwest Clean Energy Application Center

June 2011

Clean Heat and Power Specialists and U.S. Department of Energy-Qualified Industrial Energy Efficiency Specialists

In Alaska, Idaho, Montana, Oregon, and Washington

Areas of Expertise

Steam Systems • Process Heating • Pumping Systems • Compressed Air
Fan Systems • Clean Heat & Power (CHP)

Introduction

Industrial energy efficiency and Clean Heat and Power (CHP) encompass a wide range of expertise, analytical software tools and technologies. The Northwest Clean Energy Application Center <http://www.northwestcleanenergy.org/> and the state energy offices present this list of Specialists by area of expertise. Consulting or energy assessments may be obtained from the individuals and organizations on this list.

The U.S. Department of Energy qualifies industrial energy specialists in steam, process heating, pumping, compressed air and fan systems for their Industrial Technologies Program:

<http://www.eere.energy.gov/industry/>.

To become a Qualified Specialist, visit:

http://www.eere.energy.gov/industry/bestpractices/qualified_specialists/.

The CHP experts on this list have been identified by the NW CEAC as professionals currently practicing in the northwest. There is no certifying agency for CHP specialists. You may find related training on this energy events calendar: <http://www.energyexperts.org/TrainingEducationandEmployment.aspx>.

The following document lists additional energy efficiency resources for Northwest industries:

<http://www.energy.wsu.edu/Documents/IndustrialResources.pdf>.
