JOB ANNOUNCEMENTS

Water Conservation Manager

Seattle Public Utilities (SPU) has an opening for a full-time Water Conservation Manager to help lead water conservation initiatives. The successful applicant will lead the refinement of regional water conservation programs, advise SPU's senior leadership, ensure equitable delivery of conservation programs, and more. The City of Seattle encourages people of all backgrounds to apply, including people of color, immigrants, refugees, women, LGBTQ, people with disabilities, veterans, and those with diverse life experience. This position is open to all qualified candidates that meet the minimum qualifications.

[Click here for position announcement.](#)

Position closes February 13th, 2024 at 4:00 PM Pacific Time.

ANNOUNCEMENTS

Clean Buildings Tier 2 incentive Program Workshop Series

The Washington State Department of Commerce has scheduled six monthly workshops to present program details and answer questions about “Tier 2” buildings for the Clean Buildings program. These buildings may be eligible for incentives. Tier 2 buildings have a gross floor area of 20,000-50,000 sf²; multifamily buildings over 20,000 sf² are also included. All workshops via Zoom.

- [Incentive Program Workshop Kickoff](#) – Feb 22
- [Incentive Guidebook and Resources](#) – Apr 11
- [Workshop #3 Funding Distribution](#) – Jun 13
- [Workshop #4 Building Focus](#) – Aug 15
- [Utility Workshop](#) – Oct 10
- [Final Workshop](#) – Dec 12

Decarbonization Plans for District Energy Systems

In January the Washington State Department of Commerce hosted the first rulemaking workshop for [House Bill 1390](#), which amends the Clean Buildings Law to require decarbonization plans for certain publicly-owned district energy systems, and optional plans for certain campus district energy systems. A [kick-off recording](#) and [slide deck](#) of the January 18, 2023 workshop are available for viewing. Future workshops are February 8 ([register here](#)) and March 7 ([register here](#)).

Clean Buildings Programs and Workshops

Many utilities and local jurisdictions offer Incentive programs, accelerator programs, and workshops across the Washington state to assist with compliance of the Clean Buildings Performance Standard. Check the program in your territory below for announcements, dates and other information. Please note that not all are free of charge.

- Accelerator Programs
 - [Avista Clean Buildings Accelerator](#)
 - [Pacific Power Washington Clean Buildings](#)
 - [Puget Sound Energy Accelerator Program](#)
 - Kick-off dates are Jan 23, Mar 19, Jun 11, Sep 10, and Oct 29, 2024
 - [Seattle Clean Buildings Accelerator Program](#)
 - Snohomish PUD
 - Coffee Chat – [Feb 13](#) and [Mar 6](#)
 - Next Cohort begins Mar 26, 2024)
- Incentive Programs
 - [Bellevue Clean Buildings Incentive Program](#)
 - [Issaquah Clean Buildings Incentive Program](#)
- Workshops
 - [Spokane Workshop](#) sponsored by AEE Inland Empire, ASHRAE, IFMA, & WAMOA
 - WA Clean Buildings Performance Standards – Facts, Myths, and Misinformation
 - Feb 15 in person
 - [Tacoma-Pierce County Clean Buildings Symposium](#) – Feb 23 in person

ARTICLES

ASHRAE Updates

"[ASHRAE Shifts Focus to Decarbonization in Existing Buildings](#)", published on January 23, 2024 in *Buildings.com*, discusses ASHRAE's latest version of its energy efficiency standard for existing buildings. The ANSI/ASHRAE/IES Standard 100-2024 has been expanded to incorporate building decarbonization, offering a code-ready building performance standard for various building types. The key updates include new metrics for establishing greenhouse gas emissions targets, emphasizing energy management plans, low-carbon equipment integration, and ongoing operations and maintenance programs. ASHRAE President Ginger Scoggins underscores the standard's role in shaping building regulations to meet evolving sustainability needs.

Lighting's Role in Decarbonization

In "[Lighting's Role in Decarbonization Efforts](#)", published on November 3, 2023 in *Facilitiesnet.com*, the author Craig DiLouie explores the role that lighting can play toward decarbonization, which is a priority in the United States and elsewhere. Operational efficiencies can be maximized by installing LED luminaires, lighting sensors, and networked lighting that can generate data for energy management and can lead to greater occupant comfort. The evolving decarbonization trend's influence on the economics of lighting retrofits is outlined, emphasizing the need for building owners to adopt holistic approaches for sustained benefits.

Strategies for Lighting

In the *Facilitiesnet.com* article, "[Mastering Lighting Upgrades: Strategies for Success and Cost-Efficiency](#)", authored by Dan Hounsell and published on January 8, 2024, the intricacies of managing advanced lighting upgrades are examined through a case study of a Michigan public school system. The article underscores the crucial balance between aesthetics and functionality in overseeing lighting projects and emphasizes the significance of understanding facility needs. The school district implemented successful lighting upgrades, leading to substantial energy savings, reduced maintenance costs, and enhanced visual conditions for students.

UPCOMING EVENTS & TRAINING OPPORTUNITIES

ENERGY STAR® and Portfolio Manager® Trainings

All online webinars

- How to Apply for Tenant Space Recognition – Feb 1
- Portfolio Manager 101 – Feb 6
- Verifying the Application for ENERGY STAR Tenant Space Recognition – Feb 13
- Portfolio Manager 201 – Feb 15
- Portfolio Manager 301 – Feb 27
- Portfolio Manager 101 – Mar 5
- Portfolio Manager 201 – Mar 6
- Ask the Expert – every other Wednesday

Building Operator Certification. Fundamentals of Energy Efficient Building Operations

The Fundamentals of Energy Efficient Building Operations provides foundational level concepts of building systems, energy efficiency, and sustainability. Successful completion of the course (resulting in a Fundamentals Certificate) can be paired with one-year of experience for a student to meet eligibility requirements for BOC Level I.

- Six classes Mar 6 – Apr 4 via Zoom

[Click here for more information and to register](#)

Building Operators Certification

Building Operator Certification. BOC Certification

BOC Level I certification is 74 hours of training and project work in building systems maintenance. Level II certification is 61 hours of training and elective coursework in equipment troubleshooting and maintenance. Classes usually meet one or two full days a month over a period of four to six months. *All dates below are for the first class.*

- Washington
 - Level I class
 - March 27 – August 15, 2024 for Washington residents via Zoom
 - Summer 2024, dates TBA, via Zoom
 - Sept 25, 2024 – Jan 23, 2025 in Seattle
 - Level II class
 - Oct 2, 2024 – Jan 30, 2025 in Seattle, for Oregon and Washington residents
 - Oregon
 - Level I class
 - Jan 4 to Jul 11, 2024 via Zoom
 - Level II class will not run this year. Enroll with Washington Partners
- Building Operators Certification, Northwest Water & Energy Education Institute*

RESOURCES

Map a Career in Green Buildings

The [Green Buildings Career Map](#) is a highly interactive tool for a broad audience including educators, career advisors, employers, students, and job seekers. The map is divided into four sectors: Architecture, Engineering & Other Professional Services, Building Operations/Facility Management, Commercial & Institutional Construction & Retrofitting, and Residential & Multifamily Construction & Retrofitting. The map explores 55 green buildings and energy efficiency jobs across these four major sectors of the green buildings and energy industry and charts possible progression and advancement within and between sectors.

Clean Buildings Performance Standard Document Library

The Clean Buildings Performance Standard (CBPS) has a webpage listing guides, flowcharts, and tools to facilitate accurate interpretation of the CBPS. These documents are now available on the [Clean Building Performance Standard Document Library](#) page. New to the Library is [Guidance Document CBPS 016](#) published 09/13/2022 and updated: 12/21/2023. This document provides descriptions, instructions, and location of the Clean Buildings Performance Standard compliance forms for Tier 1 covered buildings.

Do you have newsletters, websites and links to share? Do you have RCM questions?

RCM News is always looking for interesting information, tips and resources to share with other resource conservation managers. Our goal is to increase your success by sharing what you and your colleagues are doing – with energy efficiency measures, problem-solving, communication, data tracking, presentations, and more. In addition, WSU Energy Program can help find solutions to your RCM program’s technical and programmatic questions. [Email Karen](#) to share and ask!

Washington RCM Support

The Washington State University Energy Program provides RCM support. Check out the “RCMx” website: <http://www.energy.wsu.edu/PublicFacilitiesSupport/ResourceConservation/RCMx.aspx>. We appreciate any feedback on this site and would also appreciate items to add to our resources, such as tools, examples of policies and job descriptions.

RCM News is prepared by the Washington State University Energy Program

This activity is funded by the U.S. Department of Energy State Energy Program. Funds provided through the Washington Department of Commerce Energy Division.
