

A New Era for Biogas & RNG in Washington and Oregon

Much has changed in policy, markets, and finance to make biogas and renewable natural gas (RNG) projects attractive to developers and investors throughout the Northwest. With Washington joining Oregon to establish a Clean Fuel Standard Program, the opportunity to use biogas and RNG to fuel vehicles makes the opportunity beneficial to many more communities.

Spend the day with experts from WSU, industry, and the public sector to discover where to find opportunities and how to take advantage of new funding.

***We are offering two full-day events that you can attend in person or by webinar.
The speakers will be tailored for Oregon and Washington participants.***

Agenda topics:

- State initiatives for biogas and RNG in Oregon and Washington
- What local gas distribution companies are doing to grow RNG supply and demand
- Latest advances in biogas clean up/conditioning and pipeline injection technology
- How renewable CNG is used in heavy-duty freight transportation
- Economic and market benefits from clean fuel and carbon credit markets
- Funding resources from federal and state sources
- Project case studies from landfills, wastewater reclamation, food scrap diversion, and agriculture

<i>Choose your event:</i>	<i>Register to attend in person or by webinar:</i>
