

WASHINGTON STATE UNIVERSITY
Energy Program

Resource Conservation Management Summit

WSU Energy Program
Resource Conservation Management
May 7, 2024

Zoom Housekeeping

- Please rename yourself with your affiliation or workplace.
- This webinar is being recorded (break-out rooms are not).
- **Please keep yourself muted unless you are talking.**
- To ask questions, use the chat or “raise your hand” to speak.
- If you are experiencing any technical issues, please call 360-956-2224 for help. Please note our limited capacity to address issues while the webinar is running.

WSU Energy Program

- Self-supporting department within Washington State University based in Olympia
- This presentation part of the Resource Conservation Management (RCM) Program
- Other programs: community solar, Washington state energy codes (residential) support, green transportation education and outreach, community energy efficiency, workforce development, and more

<https://www.energy.wsu.edu>

Resource Conservation Management Program

- RCM support and workforce development
- Public agencies in Washington State
- Provides
 - Monthly newsletter
 - Webinars
 - Publications
 - Technical assistance
 - RCM position announcements & promotion

To receive the newsletter, send email to rcm@energy.wsu.edu

** Must perform RCM work at public agencies in Washington State **

Project Support

This project was supported in part by Grant No. DE-EE0009488 awarded by the U.S. Department of Energy. Points of view in this presentation are those of the authors and do not necessarily represent the official position or policies of the U.S. Department of Energy.

Grant funds are administered by the Energy Program, Washington State Department of Commerce

Presenters and Hosts

- Karen Janowitz
Project Manager, WSU Energy Program
- Jim Jensen
Green Transportation Program Director, WSU Energy Program
- Katherine Morgan
Principal, ArchEcology
- Rebecca Sheppard
Senior Project Manager, Building Potential/Smart Buildings Center
- Britton Rife
Senior Project Manager, Building Potential/Smart Buildings Center

Agenda

- 12:00 Welcome
- 12:10 Presentation: Electric Vehicles & Resource Conservation
- 12:45 Follow-up to March 20 EMP/O&M webinar
 - and Asset data collection discussion
- 1:30 Break
- 1:40 Break-out rooms
 - University/College
 - K-12
 - Offices & Government (City/County/State/Federal)
 - Other
- 2:40 Report back from break-out rooms
- 2:55 Closing

Break-out rooms

- Break-out rooms
 - University/College
 - K-12
 - Offices & Government (City/County/State/Federal)
 - Other
 - People who support the work of others: utilities, consultants, etc
- You will choose the room you want to attend.
- Non-profits and federal sectors may consider Offices & Government
- Those not working at, or supporting, a WA public facility, please limit participation.

What's driving fleets toward alt fuels and electrification?

US Automakers Pledge 40-50% EV sales by 2030

American Honda Motor Co. · BMW North America · Ford Motor Company · General Motors · Hyundai Motor Company · Jaguar Land Rover Limited · Kia Motors America · Mazda Motor Company · Mercedes-Benz USA · Mitsubishi Motors North America · Nissan North America · Stellantis North America · Subaru of America · Tesla Motors · Toyota Motor Sales · Volkswagen Group of America · Volvo Group North America

US Automakers Pledge 40-50% EV sales by 2030

**New Emissions Standards
Expect EVs to be 67% of
New Car Sales by 2032**

Motor Company · Mercedes-Benz USA · Mitsubishi Motors North America · Nissan North America · Stellantis North America · Subaru of America · Tesla Motors · Toyota Motor Sales · Volkswagen Group of America · Volvo Group North America

IEA, 2023

EV adoption expected to soar in U.S. through 2030

Annual sales of electric vehicles and plug-in hybrids

Exponential energy change is all around us

CAGR **15%**

CAGR **29%**

CAGR **58%**

CAGR **54%**

RMI - Energy. Transformed.

Source: BNEF, BP, Ember, Note: CAGR is the compound annual growth rate between 2012 and 2022. All data is global

A Typical Fleet ZEV Transition

Internal Planning & Assessment

Coordinate with External Partners

Action & Funding Phase

1. Assemble your team and set goals
2. Identify EV candidates
3. Calculate electric loads
4. Facility planning and capacity assessment
5. Engage utility
6. Engage vendors and contractors
7. Finalize plans
8. Procurement
9. Installation
10. Implementation

Electric Vehicle Types

- Hybrid Electric Vehicle (HEV)
 - Uses both gas and electric motors
 - Charged through regenerative braking
 - Original Toyota Prius and lots of others
- Plug-in Hybrid Electric Vehicle (PHEV)
 - Uses both gas and electric motors
 - Can be charged externally
 - Chevy Volt, Toyota Prime series, Jeep Xe models, etc
- Battery Electric Vehicle (BEV)
 - Fully electric
 - Must be charged externally
 - Ford, GM, VW, Nissan, Kia, Hyundai, Tesla, and Rivian, etc

Light-Duty Electric Vehicles (Sedans)

Chevy Bolt

Nissan Leaf

Hyundai Ioniq

Kia Soul

Tesla Model 3

Mini Cooper

Many more...

EV Charging & Utilities

EV Charging Connectors

Level 1	Level 2	DC Fast Charging
 J1772	  J1772 Tesla	   CHAdeMO CCS Combo Tesla Supercharger
SAE J1772	SAE J1772 Tesla or North American Charging Standard (NACS)	<u>CHAdeMO – CCS Combo</u> Tesla or North American Charging Standard (NACS)
120 V	240 V	480 V
1.9 kW max	Up to 19.2 kW power	<u>CHAdeMO – typically 50 kW power</u>
		CCS Combo – up to 350 kW power
		Tesla – up to 400 kW power

Figure 2-4. Common Charging Levels and Connector Standards

Planning for EV Changing Infrastructure

Hardware and Network Options

- Power levels
- Vehicle to charger ratios
- Network versus non-network
- Load management software

Installation

- Internal electrician staff
- Local contracting services
- Meet any specific grant requirements

Workplace Management

- Administration, parking updates
- Employee training about vehicles and charging

Dual-port wall-mount unit attached to a building column. Shows L2 J1772 plug. Dept. of Commerce, Olympia
(Photo: WSU)

Single dual-port charging unit positioned to serve multiple vehicle parking spots.
(Photo: Dept. of Ecology)

Single pedestal EVSE serving three spaces including an ADA-compliant space. WSDOT, Shoreline
(Photo: WSU)

L2 EVSE located side by side to cut costs and power EVs on both sides.

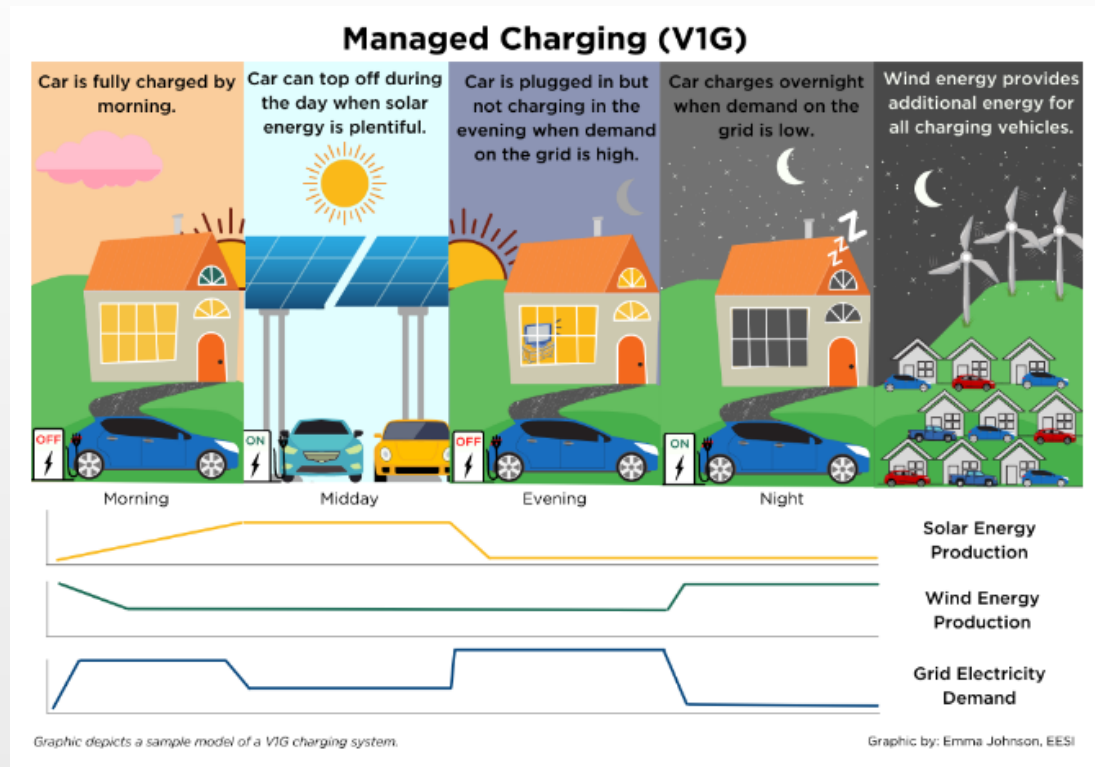

Dual-port L2 EVSE set apart to charge EVs side by side. In-ground conduit to individual concrete pads.

Utility box in foreground serves L2 EVSE in a row for EVs on both sides.

Ways to Manage EV Charging Demand

Source: Beneficial Electrification League – Electrification Toolkit

Ways to Manage EV Charging Demand

Assumptions: 1:1 V:P ratio, 10kW/EVSE, 14-hour charge window

\$23.5 B in Federal Infrastructure Investments

- \$5 B for school buses (ZEV & alt fuel)
- \$5 B for transit buses (ZEVs)
- \$7.5 B for EV infrastructure
- \$6 B for battery research/recycling
- \$39 B for transit system improvements, including accessibility (much for light rail systems)
- \$17 B for ports
- \$25 B for airports
- \$8 B for R&D for Hydrogen Hubs

\$400+ M in State Investments

- \$40 M for electric school buses (Ecology)
- \$30+ M remaining VW settlement funds (Ecology)
- \$50+ M for electric transit buses (BEBs and FCBs) (WSDOT) (\$3 billion total, Move Ahead Washington transportation package)
- Funding for ports and state and local ferries
- \$3.4 M - Zero Emission Access Program (ZAP) (WSDOT)
- \$5 M for innovative electrification (ETS) (Commerce)
- \$5 M for Tribal fishing boats
- \$7 M for clean hydrogen fueling stations
- New Interagency EV Coordinating Council and Office of Renewable Fuels
- ZEV Mapping & Forecasting Tool for infrastructure development
- \$71 M to WSDOT (from federal IIJA) for EV infrastructure on major highway corridors
- \$15 M for ZEVIP infrastructure on secondary corridors (WSDOT)
- \$100+ M for non-highway charging infrastructure (Commerce)
- \$25 M for ZEV promotion, support to underserved communities (Commerce)
- \$110 M for medium- & heavy-duty vehicles (WSDOT)

Getting EV Ready

Project Scope – Budget – Timeline

www.transportation.gov/equity-Justice40

GTP Delivers “Next Step” Assistance

- ✓ Education: website, studies, resources, publications, and more
- ✓ **Alt Fuel-Vehicle Technical Assistance Group (AFV-TAG)**
- ✓ Webinars: BEVs and infrastructure, renewable hydrogen series
- ✓ In-person events: e.g., field trips and ride-and-drives
- ✓ Coordination with utilities, agencies, and community partners
- ✓ Technical assistance: all types of public fleets (150 consults) 40 examples of next step assistance:
 - Presentations
 - Research – answering questions
 - Vehicle TCO comparisons
 - Introductions & connections (utilities, vendors, consultants, etc)
 - **Assistance planning electric school bus transitions!**

Washington **Green Transportation Program**
Moving forward with Washington's public fleets

Green transportation describes many types of mobility that conserve energy, increase efficiency, and use clean and renewable alternative fuels. The transition from fossil fuels—gasoline and diesel—is well underway. Washington consumers and fleets increasingly use alternative fuels, such as clean electricity, biofuels, and renewable fuels, to move people and goods.

This is especially true for public fleets. The Washington legislature set ambitious goals and provides grants and incentives to support green transportation at all levels of government. The WSU Energy Program maintains this Green Transportation website to provide education and technical assistance to support public fleets' transition to cleaner fuels.

Clean Buildings Discussion

Follow up to March 20 Webinar on Energy
Management Plans and O&M Programs

Large group discussion

Progress on EMPs?

Improvement project planning, share strategies for prioritizing

O&M program development and implementation

EMP development follow up

- Has anyone tried using the ArchEcology template? Is it helpful?
- What other resources are you accessing for guidance?
- What is missing or needed? Information? Staffing?

Free template kit:

<http://archecology.com/emp>

Energy Improvement Implementation

- What are lessons learned you can share around developing and implementing:
 - New policies
 - New tools
 - New practices

O&M Program Implementation

Recent poll of a BOC class* found

- 23% think their O&M program is ready for CBPS
- 45% think theirs is 'getting there'
- 27% thought theirs is not ready
- 5% not sure

* (not a scientific sample)

How are they approaching O&M?

- 11% have a mostly reactive program
- 26% said they have a mix of reactive and preventative
- 48% have a more structured/scheduled program
- 58% said they use a CMMS (computer-based maintenance management system) about a quarter of those also use BAS

O&M Management tools

- Overview article (albeit from a provider)
 - <https://safetyculture.com/app/tracking-tools/>
- Software vendor comparison site
 - <https://www.capterra.com/building-maintenance-software/>
- Some program folks mentioned using are: Maximo (IBM) most frequently mentioned, Archibus, Service Central, Compass, Fixit Maintenance Connection, Megamations
- In chat: What do you use? How do you like it?

Demo of SafetyCulture.com

- *Not an endorsement*
- Some benefits are:
 - Flexible pricing
 - Good support
 - Nice user-interface

ANYONE WILLING TO GIVE A DEMO OF YOURS?

Related Discussion Questions

- Asset data collection, reporting, and standards development
- Creating and implementing the O&M platform
- Preventative maintenance prioritization and tasking
- Methods/database systems

Can start now and carry into breakout rooms...

Break

Please come back online at 1:40

Break-out room - Universities/Colleges (Karen)

What your peers would like to discuss

- Energy efficiency related behaviors, tenant engagement strategies
 - WA State Energy Code (WSEC) changes
 - Methods/database systems
 - Clean Buildings Energy Management and O&M Plans submissions
-
- What have you been working on or busy with that would be of interest to others?
 - What's been working well?
 - What hasn't been working well?

Break-out room – K-12 (Rebecca)

What your peers would like to discuss

- HVAC costs
 - Clean Buildings requirement
 - Creating and implementing the O&M platform
 - Preventative maintenance prioritization and tasking
 - BOC
 - HB 1799, Managing Organics
-
- What have you been working on or busy with that would be of interest to others?
 - What's been working well?
 - What hasn't been working well?

Break-out room – Offices & Government

(Katherine)

What your peers would like to discuss

- EV charging
 - Energy management planning
 - Green products
 - CBPS, benchmarking, lifecycle cost analysis, energy audits
 - Asset data collection, reporting, and standards development
 - How to prioritize multiple energy projects with limited time and budget
-
- What have you been working on or busy with that would be of interest to others?
 - What's been working well?
 - What hasn't been working well?

Break-out room – Other (Britton)

- What your peers would like to discuss
(Utilities, Consultants, ESCOs)
 - Outreach & awareness of incentive programs
 - Multifamily
- What resources do you have to help people?
- How can you help their workload?
- What have you been working on or busy with that would be of interest to others?
- What's been working well?
- What hasn't been working well?

Break-out room report back

- Office/government
- K-12
- University
- Other
